THE PRODUCING POWER OF TURKEY

Naturally from our farmers

About Konya Şeker

Story of transforming of a local company to agricultural industry giant of Turkey; and it is also story of locomotive power of our sugar industry, productive power and entrepreneur spirit of Turkish farmer...

Partnership structure of Konya Şeker which is a farmer organization as of its capital structure consists of 17 cooperatives and PANKOBİRLİK which is umbrella association of the cooperatives. Konya Şeker was established in the year of 1952 with 10 million liras of capital which was all collected from the Konya community and farmers, today, carries out one-fourth of beet sugar production of Turkey. In 1999, the year that Mr. Recep Konuk had become the Chairman, Konya Şeker was a local factory with 40 million dollars debt; and since than Konya Şeker carried out 3,3 billion dollars worth of actual investment of wholly equity capital after paying of all debts within this period. Konya Şeker which increased its capital by 235 times and raised it to 950 million TL increased its turnover to 2,38 billion TL and raised it by 48 times. Konya Şeker also increased its profitability by 1.000 times and its active growth by 53 times and took its place among the Turkey's biggest 50 industrial institutions. Konya Şeker stepping into years of 2000s with its single production item of crystal sugar completed the investment of 35 production facilities within last 13 years; and increased its activity areas to five main sectors including agriculture, food, chemistry, energy and tourism; and added new production lines to its production range such from sugar products to frozen foods, from dairy & meat products to Bioethanol, from chocolate to wafer, from liquid carbondioxide to vegetable glasshouse products, from seeds to organic fertilizer, from animal feed to stockbreeding, from energy to drip irrigation, from PVC pipe to sack production.

The management philosophy which has brought this growth can be summarized under the title of Project Hope. Project Hope is a development model basing on the fact that capital and gain are spreaded to base; and with this aim, focusing on economic, social and environmental development of farmers and the places in which farmers lives.

Project Hope;

It takes into consideration that agricultural activities of the farmers as a chain from seed to dining table; and provides development of all of this chain. It aims to create a warranty of demand for harvest of the farmer while aiming to make available of natural and healthy products to the end consumer.

It supports the development of villages and towns in which farmers live by providing employment opportunities ; and takes into consideration the economic requirements of the region and Turkey while it is making its portfolio. This way, it aims both local and national developments.

It takes environmental development as primary agenda. Activities planned in scope of Project Hope primarily aims to act nearly as a natural part of the environment but not allowing to damage the environment; and the investments are planned as if it will be a natural part of that environment without leaving any waste .

The social development is also the privileged agenda. National and international social responsibility activities, supports for education, sport and health are planned in scope of Project Hope in way of contributing to overall development.

Social Responsibility

Konya Şeker is proud of being sensitive for social responsibility...

Konya Şeker rising from land of Mevlana believes in that all of the citizens, all of the institutions should contribute the society as much as their power and knowledge and support solving of problems in the community. Konya Şeker considers this is also necessary for a sustainable economic development as well as it is a must for social responsibility.

Konya Şeker carried out social responsibility projects, from its foundation in a lot of areas with this understanding. Education, sport and environment are considered as prior areas. Therefore, Konya Şeker pays special importance for these areas. It is also in proud of the results created by the projects carried out in all of 3 areas for many years. From now on, the target of Konya Şeker which has planted 18 million trees so far is to plant trees as much as population of Turkey.

We have planted **18** million seedlings,
our goal is **75** million.

Naturally from our farmers
